

MD ARMAN ULLAH

Backend Developer

Dhaka, Bangladesh | +880 1814440002 | mdarmanullah777@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven Backend Developer proficient in Python, Django, and Django REST Framework (DRF), with hands-on experience designing scalable RESTful APIs and web applications. Skilled in database design, CRUD operations, authentication, and SQL (MySQL, PostgreSQL). Proven track record of integrating third-party services, implementing role-based permissions, and managing version control via Git/GitHub for collaborative deployment on Render and Vercel.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, SQL
Backend & APIs: Django, Django REST Framework (DRF), RESTful APIs, Object-Oriented Programming (OOP)
Databases: MySQL, PostgreSQL, SQLite
Frontend: HTML5, CSS3, JavaScript, Tailwind CSS, Bootstrap 5
Tools & DevOps: Git, GitHub, VS Code, Render, Vercel, Figma

PROFESSIONAL EXPERIENCE

Backend Developer Intern

August 2026 – Present

Creative Wisdom

Dhaka, Bangladesh

- Engineered scalable backend services and modular features using Python, Django, and Django REST Framework.
- Built custom RESTful APIs, optimized CRUD logic, and implemented relational database architecture in MySQL.
- Enforced security best practices by implementing user authentication, request validation, and data sanitization.
- Leveraged Git and GitHub for team-based feature branching, pull requests, and collaborative code reviews.
- Identified, debugged, and resolved system bottlenecks in collaboration with cross-functional development teams.

KEY PROJECTS

Django E-Commerce Platform | Django, Python, JavaScript, SQLite

[GitHub Link](#) | [Live Demo](#)

- Architected full-stack e-commerce system featuring dynamic product catalogs, filtering, and cart management.
- Integrated secure online payment gateway flow handling real-time success, failure, and cancellation webhooks.
- Engineered customer account portals, product rating/review engines, and direct user-to-admin support messaging.

Hospital Management System | Django, DRF, JavaScript, PostgreSQL

[GitHub Link](#) | [Live Demo](#)

- Developed a robust REST API ecosystem for managing doctors, patients, appointments, and medical services.
- Implemented secure JWT authentication alongside role-based access control (RBAC) to enforce protected endpoints.
- Configured strict API request validation, custom serializers, and comprehensive error handling across modules.
- Optimized PostgreSQL query logic for complex data relationships and automated service schedule handling.

EDUCATION

Bachelor of Science in Computer Science and Engineering (B.Sc. in CSE)

2022 – Present

Northern University Bangladesh, Dhaka

CERTIFICATION

Full Stack Web Development with Python, Django & React

2026

Ostad (Batch 8)

ACHIEVEMENTS

- Recognized as a Top Performer in Ostad's Full Stack Web Development course (Batch 8), demonstrating outstanding technical proficiency and project execution across Python, Django, and React.
